C-101, Swaraj complex, Wadgaon Sheri, Pune - 411014

PROFILE SUMMARY

Results-driven DevOps Engineer skilled in modern development tools and automation. Proven record of delivering complex projects independently and collaboratively. Eager to drive innovation and continuous improvement in challenging environments.

EDUCATION

2014 - 2017

MSBTE

- Diploma in Mechanical Engineering

2019 - 2022

ALAGAPPA UNIVERSITY

- Bachelors in computer applications

SKILLS

- GCP
- Docker
- Kubernetes
- Linux
- Python
- Helm
- Github actions
- CircleCI
- Gitlab CI
- Bash
- AWS
- Prometheus
- Grafana
- Terraform
- Tech support
- SRE
- Aquasec
- Kafka

LANGUAGES

- English: Fluent
- Marathi : Native
- Hindi : Fluent

WORK EXPERIENCE

Fabric Group

SEPT 2025 - PRESENT

Senior Devops Consultant

- Worked on standardizing and automating ci/cd pipelines and release strategy along with reusable modules

Equal Experts

JUNE 2024 - SEPT 2025

Senior Devops Consultant

- Automated GCP deployments using Terraform, streamlining workflows, ensuring high availability, and strengthening cloud infrastructure reliability.
- Led SecOps initiatives, integrating tools like Rapid7, AquaSec, DefectDojo, GitHub Security, CodeQL, and AWS Inspector to enhance monitoring, alerting, and overall security posture.

Symbal AI

JUNE 2023 - MAY 2024

Senior Software Engineer

- Optimized and automated cloud infrastructure on GCP, leveraging GKE, Cloud Run, and related services to enhance performance and reliability.
- Scaled products to handle high concurrency and demand, ensuring seamless availability and efficient resource utilization.
- Delivered effective 24x7 customer support, resolving issues promptly to maintain service quality and client satisfaction.

Everest Engineering

April 2022 - May 2023

Software Craftsperson

- Migrated on-premise applications to AWS, implementing automation and security best practices for reliable, scalable cloud infrastructure.
- Leveraged a diverse tech stack—including AWS, BuildKite, Ansible, Packer, Python, and Linux—to streamline CI/CD and infrastructure management.
- Developed and maintained an internal timesheet application with Slack integration (Node.js, React, PostgreSQL), providing ongoing support and issue resolution.

Thoughtworks Technologies

July 2018 - April 2022

Software Consultant

- Designed and deployed scalable, secure cloud infrastructure using Terraform, Kubernetes, and Google Cloud, achieving zero-downtime deployments.
- Implemented monitoring and automation with Prometheus, Grafana, Helm, CircleCI, and Kafka to enhance system reliability and performance.
- Served as a trusted client advisor and security champion, conducting interviews, providing support, and driving high-quality software delivery through strong DevOps practices.
